Reviewer's report

Title: A case study of nurse practitioner role implementation in primary care: What happens when new roles are introduced?

Version: 3 Date: 28 November 2012

Reviewer: Rhian Parker

Reviewer's report:

This is much improved and now reads well. The final sentence on P 17 Paragraph 1, needs to be changed as it reads clumsily...'were fully...'

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
