Reviewer's report

Title: A case study of nurse practitioner role implementation in primary care: What happens when new roles are introduced?

Version: 3 Date: 14 December 2012

Reviewer: Elizabeth Halcomb

Reviewer's report:

The changes made to the paper in response to the reviewers comments have significantly improved the paper. The following minor points could improve the clarity of the paper.

Minor Essential Revisions
* The term "him or her" could be replace with "them"
* The limitations section of the paper could be expanded.
* There appears to be inconsistency in the formatting of the reference list.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
