Reviewer's report

Title: A meaningful daily life in nursing homes - a place of shelter and a space of freedom: a participatory appreciative action reflection study

Version: 2 Date: 7 March 2014

Reviewer: Mimi TSE

Reviewer's report:

1. the article is well-written, and the findings of this study, yielding qualitative data, could add knowledge to the understanding the views of older adults, living in nursing homes.

2. In the conclusion session, should add something related to clinical application, what can the nursing home staff do as a result of reading this paper? the authors could provide some suggestions in this regard.
