Reviewer's report

Title: Educating older cancer patients about their treatment: An evaluation through the eyes of patients and professionals

Version: 1 Date: 24 September 2008

Reviewer: jan foubert

Reviewer's report:

MINOR ESSENTIAL REVISIONS
I would recommend an other conclusion, the conclusion in the text is not specific (I would highlight your research questions) enough and gives an example of a booklet that is not known by the readers.

educating older cancer patients (I would put an age since you say later on the very old old patient has not been reached)

Showing more empathy and emotional support: will nurses understand this since probably they will not agree with the fact that they are not supportive enough

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
