Reviewer's report

**Title:** Prevention and treatment of intertrigo in large skin folds of adults: a systematic review

**Version:** 1  **Date:** 23 June 2010

**Reviewer:** Robert Dellavalle

**Reviewer's report:**

Excellent systematic review on the prevention and treatment of Intertrigo--was this a Cochrane Collaboration systematic review? Is this a co-publication of such a review?

Given the tremendous cost and regulatory effort for conducting RCTs there is little hope for more evidence of this type for this disease in the near future--still it is great to have such a high quality search and systematic summary of existing evidence on the record.

-Bob Dellavalle

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I am an editor for the Cochrane Skin Group and in that capacity I shamelessly promote the use of high quality systematic reviews for the improvement of medical practice.
