Reviewer’s report

Title: Impact of symptoms on quality of life before and after diagnosis of coeliac disease: results from a UK population survey

Version: 1 Date: 3 February 2010

Reviewer: Peter Green

Reviewer's report:

This study describes the responses to a large survey of patients with celiac disease. It confirms previous studies. The information in the paper is valuable. The authors acknowledge the major drawback of the study, the retrospective nature of the QOL information from prior to diagnosis.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
