Reviewer’s report

Title: Patient satisfaction in an acute medicine department in Morocco

Version: 4 Date: 30 March 2010

Reviewer: Nicolien Zwijnenberg

Reviewer’s report:

The manuscript has improved a lot; the clarity of the article is much better. The authors have performed a lot of work and have sufficiently used the proposed revisions of the previous review.

However, two final revisions are proposed:

Minor Essential Revisions:
1. I would strongly recommend that the manuscript will be reviewed by an English native speaker. This, because the quality of English is not always sufficient.
2. Add the number of patients (N) in table 2.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
