Reviewer’s report

Title: What is known about the patient’s experience of medical tourism? A scoping review

Version: 2 Date: 17 August 2010

Reviewer: Neil Lunt

Reviewer’s report:

I have reviewed the revised MS and looked at the full set of referee comments. Broadly all the referees were in agreement about the changes that need to be made.

The authors have addressed the comments and have revised the paper accordingly. The paper is crisper, clearer and makes for an interesting read.

A couple of minor points
- page 14. reference 40, 73, 79, 80. These are not about UK but appear to support a point about the UK.
- I would still question the elevation of experiential accounts given their source but the authors have addressed the point in their comments.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
