Reviewer's report

Title: What doctors think about the impact of managed care tools on quality of care, costs, autonomy, and relations with patients

Version: 2 Date: 10 August 2010

Reviewer: Benedicte Carlsen

Reviewer's report:

Response to authors’ revisions:

I have read the new version of the paper and your cover letter and I basically find that it has been much improved. I have only to minor comments to your comments.

Discretionary Revision:
Regarding point 6 in the cover letter:
I still think this chapter should be moved to the introduction, I would suggest inserting it immediately above the aim of the study. However, this is more a question of format then quality of the paper, so I suppose the editor should have the final word here.

Minor Essential Revision:
Regarding point 13 in the cover letter:
I think it would have been interesting if you could mention a few other studies that are not supported by your findings to make the discussion more interesting. As you ask for specific references, I would suggest you have a look at the following:

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
Declaration of competing interests:

I declare that I have no competing interests.
