Title: Measuring Client Satisfaction and the Quality of Family Planning Services: A Comparative Analysis of Public and Private Health Facilities in Tanzania, Kenya and Ghana

Version: 3 Date: 30 April 2011

Reviewer: Uzor C. Ogbu

Reviewer's report:

The authors have addressed my main concerns and the additional text included has sharpened the focus of the article.

My only remaining comment refers to my request for references in comment (2) under Minor Essential revisions in my original report. Indeed there are references for the last sentence. I intended to refer to the statement that the three countries are representative of the family planning situation in Sub-Saharan Africa. In what way are they representative?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
