Reviewer’s report

Title: Treatment Incidence of and Medical Utilization for Hospitalized Subjects with Pathologic Fractures in Taiwan - Survey of the 2008 National Health Insurance Data

Version: 3 Date: 3 June 2011

Reviewer: Henry Mankin

Reviewer’s report:

My only corrections and additions are related to language, which is somewhat poorer for the text corrections than for the rest of the article (Minor). It would be helpful to do statistical analysis using Kaplan-Meier technique and this might be easier to interpret than the tables (Discretionary).

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
