Reviewer's report

Title: A systematic exploration of differences in contextual factors related to implementing the MOVE! Weight Management Program in VA: A Mixed Methods Study

Version: 2 Date: 20 May 2011

Reviewer: Joseph Francis

Reviewer's report:

The authors have adequately addressed my concerns from their first draft, as well as the concerns of the other investigators. This is, after all, a preliminary study, and additional rigor can come only from a much larger sample size, given the focus on only 5 sites here.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
