Reviewer's report

Title: Early uptake of HIV counseling and testing among pregnant women at different levels of health facilities - experiences from a community-based study in Northern Vietnam

Version: 8 Date: 31 October 2010

Reviewer: Michael Pearce

Reviewer's report:

DISCRETIONARY REVISIONS
1. In Table 2, I suggest that p-values are placed on the same line as the independent variable headings to make it clear that the P-value pertains to the variable rather than a particular value.
2. In Table 2, the p-value for the variable 'monthly income' is bracketed. The brackets should be removed or explained.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
