Reviewer's report

Title: A pharmacist-led intervention for increasing the uptake of Home Medicines Review (HMR) among residents of retirement villages (PHARMER): protocol for a cluster randomized controlled trial

Version: 2 Date: 14 September 2011

Reviewer: Andrew Gilbert

Reviewer's report:

Thank you for providing the revised manuscript; all of my initial comments have been addressed to my satisfaction.

I wondered, as simply a point for consideration, if appropriate changes to medicines following a HMR or other changes as recommended by the pharmacist, may be better secondary measures than "compliance". Such a definition would include compliance aids etc but is broader and will be useful if compliance is already high.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
