Reviewer's report:

Thank you for the changes to the manuscript.
A Minor Essential Revisions: As I mentioned in the previous review, there is still some inconsistent usage of the "individual" and "patient". I suggest that the authors will choose a consistent form for clarity.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
