Reviewer's report

Title: Which health care facilities do adult Malawian antiretroviral therapy patients utilize during intercurrent illness? A cross sectional study

Version: 4 Date: 8 December 2011

Reviewer: Sam Phiri

Reviewer's report:

Again, as stated in the initial review, generally this article addresses a very important topic utilization of health services for undercurrent illnesses by patients on ART in Malawi.

I feel the authors have addressed the issues raised in the initial review

1. Is the question posed by the authors well defined?
   Yes

2. Are the methods appropriate and well described?
   Yes

3. Are the data sound?
   Yes

4. Does the manuscript adhere to the relevant standards for reporting and data deposition?
   Yes

5. Are the discussion and conclusions well balanced and adequately supported by the data?
   In general yes.

6. Are limitations of the work clearly stated?
   Yes

7. Do the authors clearly acknowledge any work upon which they are building both published and unpublished?
   Yes

8. Do the title and abstract accurately convey what has been found?
   Yes

9. Is the writing acceptable?
   Yes
Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
