Reviewer's report

**Title:** Something Is Amiss In Denmark: A Comparison Of Preventable Hospitalisations And Readmissions For Chronic Medical Conditions In The Danish Healthcare System And Kaiser Permanente

**Version:** 2 **Date:** 26 October 2011

**Reviewer:** Ingvar Karlberg

**Reviewer's report:**

Even if some questions remain unanswered, raised by all three reviewers on the relevance of the KP system for European models and the comparability, the basic data and its presentation is good enough for an interesting paper.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
