Reviewer’s report

Title: Counting on commitment; the quality of primary care-led diabetes management in a system with minimal incentives

Version: 2 Date: 5 September 2011

Reviewer: John McKnight

Reviewer’s report:

This manuscript has been improved following response to the reviewers comments. I think it could be published as is.

There is one change that should be made to table 3. I think the reporting of the SDS data does not suggest 63 % have HbA1c less than 6.5% and this needs to be edited to describe the SDS data differently.

John McKnight

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
