Reviewer’s report

Title: The effect of health care system reform on cataract surgery and intraocular lens selection in Chongqing, China

Version: 5 Date: 2 August 2010

Reviewer: Rajiv Khandekar

Reviewer’s report:

I recommend to accept with one suggestion for Discretionary Revision if information is available, kindly analyse how many eyes were operated with vision <6/60 by years. If medical insurance, uptake of modern technology enabled to operate more immature cataract it would be interesting to know. In that case it may not help the prevention of Blindness program of China in reducing cataract related blindness

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
