Reviewer’s report

Title: A snapshot of the organization and provision of primary care in Turkey

Version: 1 Date: 8 October 2010

Reviewer: Hakan Yaman

Reviewer’s report:

Dear Editor,

This paper is an interesting paper evaluating the PHC situation in Turkey. Even very promising some important flaws make the acceptance of this study difficult.

The sample size is not calculated accurately and the randomization of the doctor lists obscure.

The article reports about the development of Turkish PHC with just citing a paper from the nineties.

And there are some elementary mistakes concerning Turkish PHC.

Kind regards,

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
