Reviewer’s report

Title: The acceptability, feasibility and impact of a lay health counsellor delivered Health Promoting Schools programme in India: a case study evaluation

Version: 2 Date: 20 March 2012

Reviewer: Dean Whitehead

Reviewer’s report:

Many thanks for this resubmission. I believe that the authors have worked dilligently to address reviewers concerns and suggestions - and ably addressed them. I feel that this manuscript is much improved and reads much better for these changes. I have one further recommendation:

1. Minor essential revisions - in the introduction, I would like to see a little more elaboration on the context of the WHO’s Health Promoting Settings movement - and how it impacts on health-promoting schools - to include the seminal works of authors such as Mark Dooris. Lawrence St Ledger, Dean Whitehead etc

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
