Reviewer's report

Title: Acceptance of the WHO Surgical Safety Checklist among surgical personnel in Hospitals in Guatemala City

Version: 2 Date: 26 March 2012

Reviewer: Bradley V Watts

Reviewer's report:

In general I felt this was a well written and easy to follow manuscript. The overall idea to seek staff views about checklist is a very solid one. I see this as a contribution to the field of patient safety.

Major Compulsory Revisions

Unless I missed it I see far too little detail about the survey method and especially the response rate. I think it is essential to know who (and how many) people were surveyed and then the percentage who returned the survey.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
