Reviewer's report

Title: Perception of evidence-based practice and the professional environment of Primary Health Care nurses in the Spanish context: A cross-sectional study

Version: 1 Date: 28 February 2012

Reviewer: Claire Goodman

Reviewer's report:

Major Compulsory Revisions (please also see detailed comments)
The background section needs to consider the evidence on EBCP in primary care and community settings

The results need to be more explained in more detail and linked to the questions asked by the instruments used

The discussion and conclusion need revision for clarity and finding should be critically discussed in relation to what is already known about EBCP in primary care

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
