Reviewer's report:

I have read the manuscript to determine the extent to which my previous comments have been taken into account. The authors have responded to the comments from reviewers.

Minor comments are below:

Page 6: last para of the settings-line 2 states 26, whereas line 4 states 27—which one is correct?
Page 13: insert of between most and PHC (line 7 from bottom)

The paper could still benefit from a thorough edit, and that would reduce the word count

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
