Reviewer’s report

**Title:** Home medication management practices and associated factors among patients with selected chronic diseases in a community pharmacy in Uganda

**Version:** 1 **Date:** 28 April 2012

**Reviewer:** Joanne Brien

**Reviewer’s report:**

There is a clear, well defined research question and the methods applied are appropriate to the research aims. The data analysis approach is appropriate, and results are clearly presented. The statistical analysis details are sufficient for the publication and the interpretation of the data appears appropriate. The discussion relates the study data to the international literature, and reasonable commentary is provided by the authors as to the international comparisons that may be made. The English language expression is appropriate for an international journal.

There is appropriate ethical approval for the conduct of the study.

**Level of interest:** An article of importance in its field

**Declaration of competing interests:**

I declare that I have no conflicts of interest in the review of this study.
