Reviewer's report

Title: Clinical decision support must be useful, functional is not enough: A qualitative study of computer-based clinical decision support in primary care

Version: 2 Date: 29 August 2012

Reviewer: Alexander Fiks

Reviewer's report:

The authors have now addressed the suggested revisions and very much strengthened this manuscript. The added quotations, screen shots, and context are very helpful.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am a co-inventor of a decision support system known as the "Care Assistant." I hold no patent, no licensing agreement exists, and, to date, I have earned no income from this invention.
