Reviewer's report

Title: Clinical decision support must be useful, functional is not enough: - A qualitative study of computer-based clinical decision support in primary care

Version: 2 Date: 16 August 2012

Reviewer: Khaled Abdel-Kader

Reviewer's report:

It is unfortunate that further inquiries regarding the perceptions of usefulness and what this meant to individual users were not available.

The authors have sufficiently responded to my concerns and the article is acceptable for publication.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
