Reviewer's report

Title: Validation of the Disease Burden Morbidity Assessment by Self-Report in a French-speaking population

Version: 2 Date: 13 January 2012

Reviewer: Marijke Veenstra

Reviewer's report:

Discretionary Revisions: The explanation of the Family Medicin unit is clear in the response. The authors chose not to write this in the paper under Methods. I wonder if an international audience is familiar with the concept of Family medicine Unit or could benefit from this description.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
