Reviewer’s report

Title: Development of a set of process and structure indicators for palliative care: the Europall project

Version: 6 Date: 1 August 2012

Reviewer: Katja Hermann

Reviewer’s report:

I think the authors have dealt with all the suggestions and recommendations. Flow chart and table are really helpful to understand the procedure.

Minor issues not for publication:
There are only two minor points regarding the references:
1. The reference to the study of Claessen et al. is missing in the manuscript (no. 85 in the reference list) – it should appear immediately before or within the first paragraph of “Strength and limitations” in the Discussion section (or removed from the reference list).
2. References no. 7 and no. 88 are identical.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
