Reviewer’s report

Title: A systematic review of evidence on interventions to enhance access to best practice primary health care

Version: 3 Date: 8 October 2012

Reviewer: John Wakeman

Reviewer’s report:

The authors have satisfactorily addressed all of my comments, other than the suggestion of a table specifying inclusion & exclusion criteria. Re-reading the revised methods and discussion section, the criteria are reasonably clear.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
