Reviewer’s report

Title: The development of a lay health worker delivered collaborative community based intervention for people with schizophrenia in India

Version: 2 Date: 20 December 2011

Reviewer: lora H beebe

Reviewer’s report:

MAJOR COMPULSORY: a well written article that I recommend revise and resubmit. This is really TWO papers. The first should report findings from the qualitative data from teh interviews, and the second should take up at approximately page 4 of the current Manuscript and describe the pilot findings. In addition, the qualitative portion of the manuscirpt would benefit from additional detail of the analysis method and procedures for assuring quality of analysis.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
