Reviewer’s report

Title: Persisting stigma reduces access to the use of HIV-related care and support services in Viet Nam

Version: 2 Date: 27 May 2012

Reviewer: Theodore Hammett

Reviewer’s report:

The authors have done an excellent job of responding to the reviewers' comments. I have only one further comment: the term "enacted" discrimination should be defined. The manuscript would also benefit from a careful edit.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
