Reviewer's report

Title: Can colorectal cancer survivors recall their medications and doctor visits reliably?

Version: 1 Date: 30 April 2012

Reviewer: Andrew Veitch

Reviewer's report:

This paper is of interest to those involved in research into utilisation of health service resources. It is focused on a very specific patient group, in one healthcare system, but raises issues of more general applicability. Although numbers are small, the methodology is sound, and discussion of the results comprehensive and appropriate

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
