Reviewer's report

Title: Determining adult type 2 diabetes-related health care needs in an indigenous population from rural Guatemala: A mixed methods preliminary study.

Version: 3 Date: 7 December 2012

Reviewer: Vanessa Johnston

Reviewer's report:

The authors have adequately responded to comments in the most recent revision of their paper. This paper reads really well after the additional work they have put into it and I think it's a great contribution to the literature on diabetes among Indigenous populations.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
