Reviewer's report

Title: What aspects of quality of primary care predict emergency admission rates? A cross sectional study.

Version: 5 Date: 16 October 2012

Reviewer: Sarah Purdy

Reviewer's report:

Thank you for asking me to re-review this paper.

The authors appear to have addressed the major concerns raised by the reviewers, most of which relate to the limitations of the study design - ecological and the QOF as a measure of 'quality'

Major revisions - none

Minor revisions - I think the hazards associated with investigating multiple variables in an ecological study could be emphasised more in the discussion

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
