Reviewer's report

Title: Patients satisfaction on tuberculosis treatment service and adherence to treatment in public health facilities of sidama zone, south Ethiopia.

Version: 2 Date: 27 September 2012

Reviewer: Zeba Rasmussen

Reviewer's report:

The paper poses a good question, on an important topic, and has good background research and references

1. Must get English editing of manuscript. Methods and results are particularly difficult to understand. Including questionnaire used might be useful to understand various factors analyzed.

2. All Tables need proper labelling on top, as first 3 all say "Table 1"

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
