Reviewer's report

Title: Implementation evaluation of the Dutch 'national heat plan' among long-term care institutions in Amsterdam: a cross-sectional study

Version: 2 Date: 5 January 2013

Reviewer: Graham Bickler

Reviewer's report:

The authors have appropriately addressed all the comments the two reviewers made, and my only further comments relate to a few minor examples where the English could be improved:

p4 ‘to undertake such’ should be ‘that they had undertaken’

p7 ‘down already’ isn’t clear

p10 ‘anecdotic’ should be ‘anecdotal’

p11 remove ‘will’ from ‘wnem heatwaves will occur’

p12 ‘nonetheless’ not ‘none the less’

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
