Reviewer's report

**Title:** Death certificate completion skills of hospital physicians in a developing country

**Version:** 3  **Date:** 19 February 2013

**Reviewer:** Ethem Erginoz

**Reviewer's report:**

1. The method of the manuscript is not well defined, especially the authors did not mentioned how they decided correct or wrong about the death certificates. Decision of grade five is not well defined.

2. Grade three, it is not understood whether all patients had co-morbidite or not.
