Reviewer’s report

Title: Do governance choices matter in health care networks? An exploratory configuration study of health care networks

Version: 3 Date: 29 January 2013

Reviewer: Rachael Addicott

Reviewer’s report:

The authors have done a good job of addressing the reviewers’ comments.

I am still not sure that there is sufficient attention paid to the idea of effectiveness. I gather that the authors are measuring perceptions of effectiveness, but I feel that this needs to be brought out in greater detail - including the limitations of this approach.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
