Title: Understanding public preferences for avoiding health losses caused by lapses in healthcare safety and patient lifestyle choices

Version: 2 Date: 9 April 2013

Reviewer: Simon J Palfreyman

Reviewer’s report:

Minor Essential Revision
It would be helpful if the authors could have a conclusion or summary section which brought together their findings and implications for valuation studies and healthcare.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
