Reviewer's report

Title: Healthcare Technologies, Quality Improvement Programs and Hospital Organizational Culture in Canadian Hospitals

Version: 2 Date: 20 March 2013

Reviewer: Abby S Kazley

Reviewer's report:

This paper, while improved, did not necessarily address all issues from the reviewers. It should be clarified if the survey was electronic, and the methods section is still quite technical. I also wonder if you provided definitions for the health care technology applications listed in your surveys. One thing that has challenged researchers is being sure that respondents are consistent in what they consider EMR or CPOE. Please define them if you have provided such information to survey respondents. In fact, why not include all the surveys, not just the culture one?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
