Reviewer's report

Title: Physicians' perceptions of quality of care, professional autonomy, and job satisfaction in Canada, Norway, and the United States

Version: 4 Date: 31 July 2013

Reviewer: Jeralynn Cossman

Reviewer's report:

The authors handled most concerns I previously addressed with their manuscript--in some cases, this was merely by adding to the limitations. Of my remaining concerns, only one can be addressed.

1. I will note that the Norwegian survey has a much smaller N than the other two surveys, but I do not feel it is compromising the validity of the study.

2. The only remaining revision, in my estimation, is a justification and explanation of Figure 1, which appears to be absent.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests.
