Title: Evaluation of a tailored, multi-component intervention for implementation of evidence-based clinical practice guidelines in primary care physical therapy: a non-randomized controlled study

Version: 3 Date: 10 February 2014

Reviewer: Henna Hasson

Reviewer's report:

The authors have done a thorough and detailed work in the revision of the paper. The relevant parts have been revised. I totally understand that some of the suggestions for revision were too comprehensive considering the length of the paper. I don't have any further comments on the paper.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
