Reviewer's report

**Title:** Exploring views on long term rehabilitation for people with stroke in a developing country: Findings from focus group discussions.

**Version:** 2  
**Date:** 12 December 2013

**Reviewer:** Jacqui Morris

**Reviewer's report:**

As a thought on reading the paper again, I wonder if they have considered community based exercise for community based stroke survivors. That is increasingly being used in the UK to support survivors to remain active, to address health risks of a post-stroke sedentary lifestyle and to maintain and improve function and mobility.

I might be worth their considering for inclusion in the discussion section.

**Level of interest:** An article of insufficient interest to warrant publication in a scientific/medical journal

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
