Reviewer's report

**Title:** Disaster resilience in tertiary hospitals: A cross-sectional survey in Shandong Province, China

**Version:** 2  
**Date:** 25 November 2013

**Reviewer:** James Paturas

**Reviewer's report:**

The article was well written and the only comment relates to the survey that was included. While the information contained in the survey (assessment) was accurate, it seemed to lack the depth of other issues or activities that could be considered when assessing a hospital's ability to ensure organizational or enterprise resiliency.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.
