Reviewer's report

Title: Health care utilization for acute illnesses in an urban setting with a refugee population in Nairobi, Kenya: a cross-sectional survey

Version: 2 Date: 23 April 2014

Reviewer: Myriam Ruiz-Rodriguez

Reviewer's report:

The new version of manuscript is better than the original. However, it is important to improve two sections:

Minor Essential Revisions

1. Figure is based on households’ data, but it will be better if include individual data (comment 9 in previous review). Please include sample sizes of individuals for each table.

2. Multivariate results (Adjusted OR) are not shown in this version. In table 4 are the unadjusted OR. For a better understanding of this section it is important to include in the text (page 15) adjusted OR with confidence intervals for each variable with significative p values.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
