Reviewer’s report

Title: In-Office Diagnostic Arthroscopy for Knee and Shoulder Intra-articular Injuries - Its Potential Impact on Cost Savings in the United States

Version: 5 Date: 31 January 2014

Reviewer: Yanping Huang

Reviewer’s report:

Major compulsory revisions:
1) Please respond to the general comments of my first review;
2) Combine Table 5 and Table 6 into one. You should note that ALL the data of Table 6 are included in Table 5!!
3) Now the Appendix 2 data were coming from CY 2006 but not 2012? Be serious!
4) The FN number of patients with meniscal tears should be “43,518” in your original Appendix 2. Please change Appendix 2 if it is "42,518".

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
