Reviewer's report

Title: Feasibility of provision of sustainable intra-dermal post exposure prophylaxis against rabies at primary care level - evidence from rural Haryana, India

Version: 3 Date: 20 March 2014

Reviewer: Joyce You

Reviewer's report:

This is a paper describing the general operation of an Animal Bite Management clinic in India.

The article did not have any clear or focused objective or outcome measures. The methods sections mostly described the operational procedures and training of clinic staff.

The Results section included the demographic profile of patients and inventory of vaccine. The cost of services and burden on the staff were not adequately described.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
