Reviewer's report

Title: Perspectives on reproductive healthcare delivered through a basic package of health services in Afghanistan: a qualitative study

Version: 2 Date: 1 August 2014

Reviewer: Leonard Rubenstein

Reviewer's report:

The authors have responded to all my queries and concerns. One of the discretionary revisions I suggested was to strengthen the conclusion. The authors have added to the conclusion though not in the way I had hoped as it draws no conclusions in answer except in parenthetical form to the question posted at the start, which is "In what ways has the BPHS affected SRH service provision".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
