Reviewer’s report

Title: How do risk preferences relate to malaria care-seeking behavior and the acceptability of a new health technology in Nigeria?

Version: 2 Date: 12 June 2014

Reviewer: Sophie GITHINJI

Reviewer’s report:

The authors have tried to respond to most of my comments. One minor thing; they say the funders did have any role in the study design and execution. I expected this role to be clearly defined.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
